11/16/74

Dear Jim,

Your mailing of October 12, of copies you were to have prepared for me of discovery materials, has just arrived. I have just returned from our mailbox, 12:20 p.m. 11/16/74 with it. I also asked Bill to examine it before I touched it other than to carry it to the house.

This mailing also has been opened.

I am preserving the package as I received it except that I have scissored off the top to gain access.

Obviously, when I needed this documentation to do what I had to do and because of this intrusion could not have for the hearing, this becomes more than just another of the many intrusions into my mail.

I will attach a carbon of this to that envelope.

How joyous I am that we have colleagues of stout heart only!

It had been agreed that we would begin the recent hearing with a motion on this and related matters.

Truly, there is no subsitutute for courage.

Or deeply-felt principle.

Sincerely,
